Summary

Motivated Computer Science undergraduate with experience in software development using Python, Flask, SQL, and JavaScript. Proficient in RESTful APIs, software testing, debugging, DBMS, Operating Systems, and Data Structures & Algorithms. Eager to contribute as a System Engineer through strong problem-solving and collaborative skills.

Education

- Malla Reddy College of Engineering | JNTUH**
Bachelor of Technology (B.Tech) – Computer Science and Engineering
August 2022 – May 2026
CGPA: 7.0/10

Projects

Priority List – Task Management Web Application

- Technologies:** Python, Flask, MySQL, HTML5, CSS3, JavaScript, REST APIs
- Developed a full-stack task management web application using **Python Flask** and **MySQL** to organize and prioritize daily tasks.
- Designed and implemented **RESTful APIs** supporting CRUD operations for efficient task creation, updating, retrieval, and deletion.
- Integrated a relational database using **MySQL** to securely manage application data.
- Applied **Object-Oriented Programming** principles to develop modular and maintainable backend components.
- Collaborated with a team of four members using **Agile methodology** to complete project milestones successfully.

Employee Management System

- Technologies:** Python, Flask, MySQL, HTML5, CSS3, JavaScript, REST APIs
- Developed a secure Employee Management System using **Python Flask** with MySQL database integration.
- Built **RESTful APIs** to manage employee records through CRUD operations.
- Implemented authentication and session management to ensure secure administrator access.
- Optimized SQL queries to improve employee record retrieval and overall application performance.
- Enhanced backend functionality by implementing efficient validation and data management techniques.

Technical Skills

- Programming: Python, SQL, JavaScript
- Frontend: HTML5, CSS3, React.js, Next.js
- Backend: Flask, Node.js, Express.js, REST APIs
- Databases: MySQL, PostgreSQL
- Core Computer Science:- Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Responsive Web Design, CRUD Operations, Authentication(JWT)
- Software Engineering:- Software Development Life Cycle (SDLC), Software Testing, Agile Methodology
- Tools:- Git, GitHub, Docker

Achievements

- Developed 2 end-to-end full-stack web applications using Python, Flask, MySQL, JavaScript, HTML5, and CSS3.
- Led a team of 4 members by coordinating development tasks and ensuring successful project completion through effective collaboration.
- Strengthened backend development skills by designing RESTful APIs and integrating relational databases in real-world academic projects.

Certifications

- Python Programming Certification – Udemy
- Full stack Web Development – Udemy
- SQL & Database Management – Udemy

Soft Skills

Problem Solving, Analytical Thinking, Communication Skills, Team Collaboration, Leadership, Adaptability , Time Management, Quick Learner, Attention to Detail, Continuous Learning.
